

# Autism Intervention

LECTURE

**Ms. Sabine Baeyens**, Qigong Sensory Therapist & Master Trainer; based in Belgium and supporting professionals & parents of children with autism; is visiting us.

*All children with autism, Down syndrome or CP, suffer from sensory disorders. Breakthrough research linking the severity of sensory disorders to the severity of autism shows that when sensory disorders are treated, autism decreases in severity. The research shows that **the key to treating the sensory disorders in autism is the sense of touch.***

*Qigong Sensory Training, QST-therapy, is a specialized form of massage from Chinese medicine, known as qigong massage. The massage treatment normalizes the sense of touch. As touch normalizes, so do the other sensory and autism problems.*

The Association of Special Needs Education Teachers in Uganda (ASNETU) in conjunction with Oyesigye Special Child Foundation - Ruti, Mbarara Municipality will hoist Ms. Sabine Baeyens on

**Monday 3<sup>rd</sup> February, 2020 at ...  
Mbarara University of Science & Technology (MUST)**

**Tuesday 4<sup>th</sup> February, 2020 at ...  
Oyesigye Special Child Foundation - Ruti**

From research, QST has developed a means of healing the sensory impairment of a child with Autism if he/ she is still less than 12 years old.

Come in person and listen to this therapist.
